

Fan Wheels

Fan Wheels designed to grind and blend fillet welds and corners.

When in use the flaps open forming a V-shape, perfectly blending welds to near invisible.

Fan Wheels are made in either Aluminum Oxide or Zirconium.

Safety

Fan Wheels perform best between 15-25m/s, this giving the optimum balance between stock removal, surface finish, cutting temperature and life.

NB! Excess speed is dangerous and may result in wheel disintegration, grain shedding and overheating.

NEVER USE PROPELLER & SLOTTED DISCS AT SPEEDS IN EXCESS OF 30m/s.

Do not use wet or in any coolant or oil.

Use in accordance to ANSI B7.1.

Standard Sizes Available

Dia	Bore
180mm	22mm

Standard Grit Sizes

Grit Size	Alo.	Zir.
