## Coated Abrasives Rolls Specification

Material	Grain	Backing	Special Features	Application
GXK56	AlO3	XY PC	WP HT	For heavy duty wood, metal, stainless, chrome and general. Can be used in oil and coolant.
GXK51	AlO3	X PC	NASS	For general medium to light duty wood, plastic, metal and light stainless applications.
GXK51-ZQ	AlO3	X C		Used for the production of flap wheels and specialty abrasives. Wood, plastics, metals and stainless
JT133	AlO3	J PC	WR	For general flexible grinding and polishing applications. Wood, metal, plastic and stainless. Crank polishing
JB5	AlO3	J C		For general hand operations. Used to slit into handy rolls.
BYC81	SiC	Y P	WP HT	For heavy duty non-ferrous applications. Glass, wood, stainless and masonry. Segmented wide belts.
GPC71	SiC	X PC	WP	For med and light duty non-ferrous applications. Glass, wood, stainless and masonry.
ZC710X	Zir/AlO3	X PC	WP	For medium duty metal, hard wood and stainless applications.
ZC711X	Zir/AlO3	X PC	WP	For heavy duty metal, hard metal and stainless steel applications. Extra sharp edge.
ZC812Y	Zir/AlO3	Y P	WP HT	For heavy duty metal, hard metal and stainless steel applications. Top size for grain ripping and grain preservation.
CRC730X	Ceramic	XY PC	WP HT	For heavy duty metal, hard metal and stainless steel applications.
CRC832XY	Ceramic	Y P	WP HT	For heavy duty metal, hard metal and stainless steel applications. Top size for grain ripping applications and grain preservation.
COMPACT	AlO3	Y P	WP HT	Multi layered grain. Self sharpening. For med grinding and polishing applications. Metal, hard metals and stainless steel.
ENGINEERED	AlO3	X PC		Multi layered grain. Self sharpening structured grain. For med grinding and polishing applications. Metal, hard metals and stainless steel. Can be used wet.
CORK	SiC	X PC	WP	For non-ferrous, glass, masonry and stainless steel polishing. Can be used wet.
